Filed : February 11, 2004

AMENDMENTS TO THE CLAIMS

Please cancel Claims 2, 4, 5, 13-14, 16-22, 103-106, 108-110, 112-116, and 124 without prejudice or disclaimer.

1. (Original) A medical kit comprising:
 - a basin configured to collect fluid during irrigation of a wound on a human knee;
 - a basin configured to collect fluid during irrigation of a wound on a human shoulder;
 - a basin configured to collect fluid during irrigation of a wound on a human elbow or ankle; and
 - a basin configured to collect fluid during irrigation of a wound on a human hip;
 - a grommet, the grommet having a fitting part and a sealing part;
 - an irrigation shield having an aperture configured to engage an irrigation device;and
 - a cannula having an adhesive surface;
 - wherein at least one of the basins includes at least one surface, said surface having at least one convertible portion, the basin being sterilized and made of a bio-compatible hypo-allergenic material.
2. **(Canceled)**
3. (Previously Presented) A medical kit comprising:
 - at least one basin with a sidewall portion and a bottom wall portion;
 - a conversion device configured to provide a substantially leak-proof barrier on at least one of the sidewall and bottom wall portions in a first state and to form a drain in a second state, through which fluid inside the basin can be drained; and
 - a cannula having an adhesive surface.
4. **(Canceled)**
5. **(Canceled)**
6. (Previously Presented) A medical kit comprising:
 - at least one basin with a sidewall portion and a bottom wall portion;
 - a conversion device comprising a frangible portion and configured to provide a substantially leak-proof barrier on at least one of the sidewall portion and the bottom wall

Appl. No. : **10/776,083**

portion in a first state and to form a drain in a second state, through which fluid inside the basin can be drained; and

a grommet having a sealing part and a cannula, the sealing part configured to define a substantially watertight seal with the drain formed by the frangible portion in the second state.

7. (Previously Presented) The medical kit of Claim 6, wherein the grommet includes a fitting part configured to engage a suction hose.

8. (Original) The medical kit of Claim 7, wherein the fitting part of the grommet has a stepped outer surface.

9. (Original) The medical kit of Claim 6, wherein the grommet further comprises a peel-off seal.

10. (Previously Presented) The medical kit of Claim 6, wherein the grommet further comprises a strainer.

11. (Original) The medical kit of Claim 6, wherein the grommet includes a fitting part made of a hard plastic.

12. (Original) The medical kit of Claim 6, wherein the sealing part of the grommet is made of a flexible rubber.

13. **(Canceled)**

14. **(Canceled)**

15. (Previously Presented) A medical kit comprising:

at least one basin with a sidewall portion and a bottom wall portion; and

a conversion device comprising a tube having a first end disposed at an upper edge of the sidewall portion and a second end disposed at the bottom of the sidewall portion and a removable seal disposed over at least one of the first and second ends of the tube, the conversion device configured to provide a substantially leak-proof barrier on at least one of the sidewall portion and the bottom wall portion in a first state and to form a drain in a second state, through which fluid inside the basin can be drained.

21. **(Canceled)**

22. **(Canceled)**

23-102. **(Canceled)**

103. **(Canceled)**

104. **(Canceled)**

105. **(Canceled)**

106. **(Canceled)**

107. (Previously Presented) A medical basin for collecting fluid during irrigation of a wound on a human anatomy comprising:

at least one sidewall and a bottom, the at least one sidewall and the bottom defining a cavity; and

at least one convertible portion in at least one of the bottom and the at least one sidewall, wherein the at least one convertible portion is configured to define an aperture through the at least one sidewall and bottom when the at least one convertible portion is modified and the at least one convertible portion comprises a hole having a peel-off seal.

108. **(Canceled)**

109. **(Canceled)**

110. **(Canceled)**

111. (Previously Presented) A medical basin for collecting fluid during irrigation of a wound on a human anatomy comprising:

at least one sidewall and a bottom, the at least one sidewall and the bottom defining a cavity; and

at least one convertible portion in at least one of the bottom and the at least one sidewall, wherein the at least one convertible portion is configured to define an aperture through the at least one sidewall and bottom when the at least one convertible portion is modified and the at least one convertible portion comprises a nipple having a peel-off seal removably disposed thereon.

112. **(Canceled)**
